FREE Cargo Floor CF-TX remote control app

Dear customer,

Never again: the remote control for your Cargo Floor moving floor lost - or empty - before use!
Control your Cargo Floor moving floor system with your own Smartphone!

Click here for iOS

From now on the Cargo Floor remote control app is available for the iOS of Apple's smartphones. This means that anyone with a smartphone can now operate his or her Cargo Floor system, equipped with a [blue APP receiver](#), with this handy free app.

Click here for Android

Until now, the app was only available for smartphones with Android. We are very happy to see that hundreds of users have installed the app and apparently to full satisfaction: 5 stars!

Retrofitting "plug and play"

The original APP receiver can also - simply - be installed afterwards via the plug and play principle: plug the receiver in, download the app, connect and get started!

The APP receiver is temporarily - at a reduced introductory price - available. Interested? Request it via the [webshop](#) or info@cargofloor.com.

Important

The Bluetooth signal determines the actual range and can be limited and vary! Make sure you remain in the Bluetooth range. When a disconnect occurs the Cargo Floor moving floor will, because of safety reasons, turn off automatically. You will have to re-connect again.

We wish you many safe kilometres and easy control with this app for your Cargo Floor.

With best regards,

Cargo Floor B.V.
Coevorden, The Netherlands
